

# **SOFTWARE TESTING**

**IN A DIGITAL  
TRANSFORMATION JOURNEY**

# About me

---

## Alan Cafruni Gularte

- Bachelor in System Information
- Specialist in Big Data & Data Science
- 12+ years in IT
- 7 years in Software Testing
- Senior Consultant for CaaS (Kubernetes) @ Dell Technologies

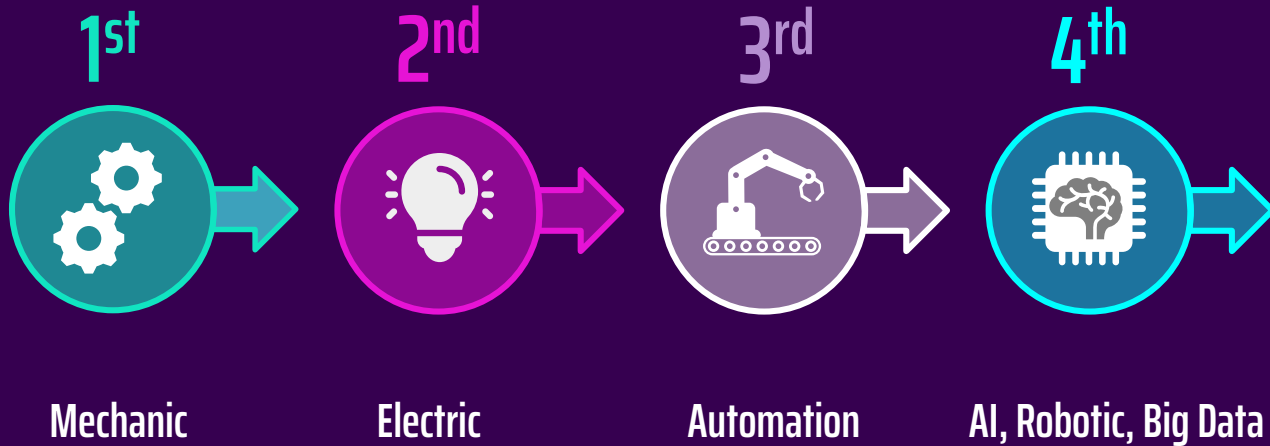

"THE PRESENT TIMES ARE 'LIQUID' BECAUSE EVERYTHING CHANGES SO QUICKLY. NOTHING IS BUILT TO BE DURABLE, TO BE 'SOLID'."

**ZYGMUNT BAUMAN**

**Agile**

**?**

Where **software testing**  
is in this transformation?

**FASTER DELIVERIES,  
BIGGER BUGS RISKS**

**TESTS ARE ESSENTIAL**  
**MORE THAN EVER**

# The Major Challenges

---

- Shorter and faster testing life cycles
- Data Management
- Environment Validation
- Testing scripts creation and maintenance
- Cloud Testing

# The Journey

---

Process

Technologies

Tools

People

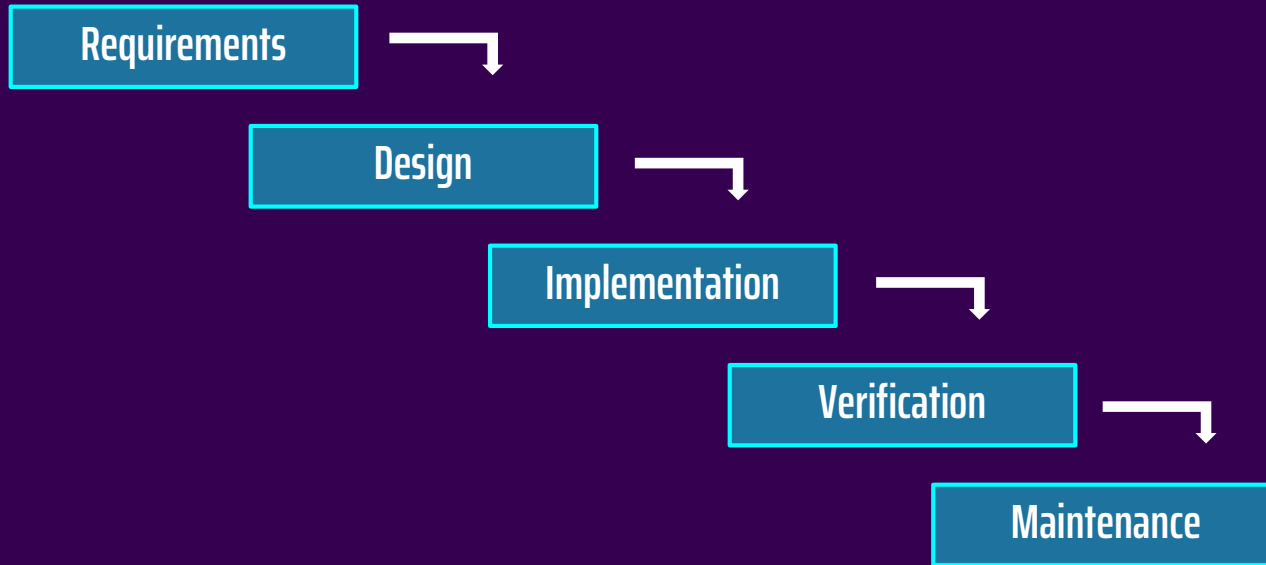

**1**

**Process**

# Waterfall

---

# Waterfall

---

## Pros

- **Predicable**
- **Documentation**
- **Financial cost**

## Cons

- **Longer delivery time**
- **Lack of flexibility**
- **Customer satisfaction**

# Agile

tests

# The New Era of Scripting

Regression test cases  
up-to-date based on  
end user journey

NLP + ML to convert  
stories in scripts

AI for image  
recognition to  
create scripts

Test scripts auto-  
fixed after new code  
version deployed in  
test environments

# Live Results Dashboards

---

- No more email reports: information on the fly!
- Passed vs Failed vs Blocked Test Cases
- Performance metrics: response times, resources usage, network, throughput, failures
- Tracking of defects
- Others: percentage of conclusion, allocation of environment

Security

Performance

**NICE TO HAVE**

Security

Performance

~~MUST~~ MUST TO HAVE

**People**

# TESTERS VS THE REST

THE RELATIONSHIPS BETWEEN TESTERS AND EVERYONE ELSE IN THE PROJECT TEAM HAS BEEN REVOLUTIONALISED THROUGH AGILE

PRE-AGILE

AGES AGO

WILD WEST

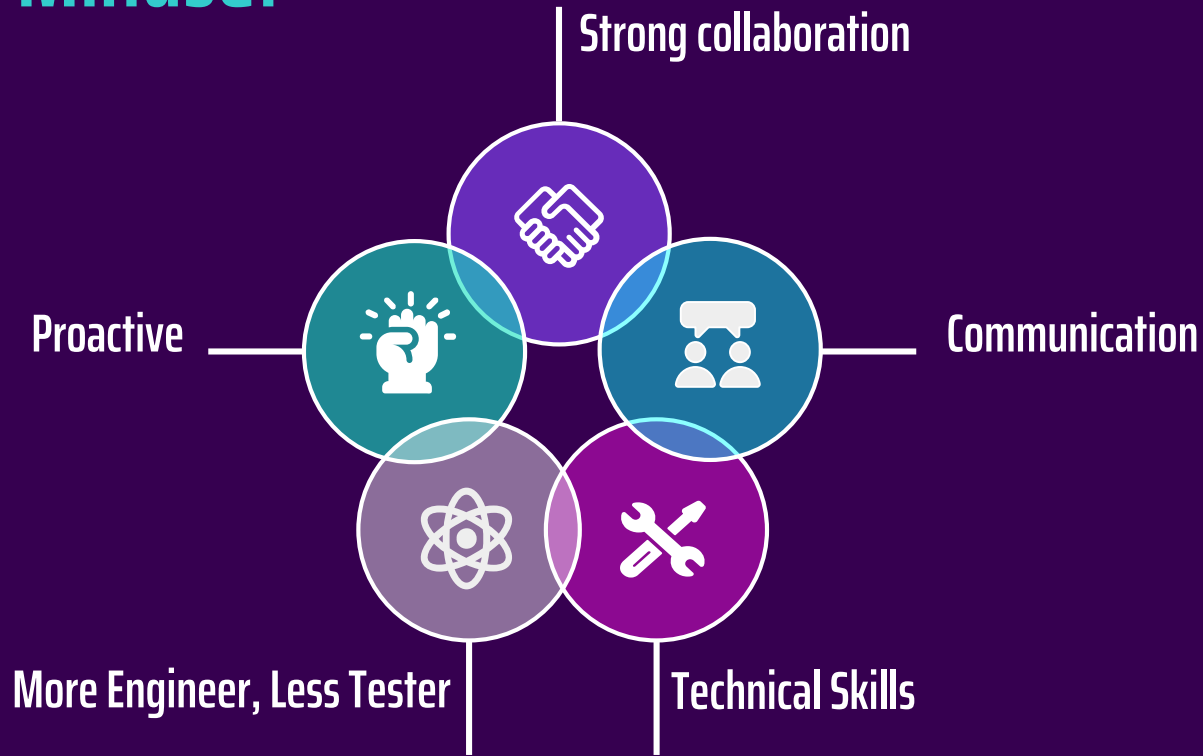

UNTIL RECENTLY

POST-AGILE

THEN AGILE CAME ALONG. NOW INDIVIDUALS AND INTERACTIONS ARE MORE IMPORTANT THAN PROCESSES AND TOOLS

# Change of Mindset

# Reactive

Wait definition of  
DEV/PM/PO

# Proactive

Influence in planning sessions to define architecture of final product

Production load monitoring to calibrate regression scenarios – Workload Model

Real end-user monitoring to check their navigation behavior -> suggestion of new test scenarios to cover

Automation of Data Management using AI

**What can we  
conclude?**

# Software Testing in Digital Transformation

---

- The world requires more solution in shorter period – ‘liquid’ times
- More risks of bugs – software testing is essential more than ever
- Autonomous Testing is the key concept
- It's not only about technical skills and technologies – need to change your mindset
- It is just the beginning of the digital transformation!

# Questions?

thank

you
